Addendum No. 03

File Reference Number: RFP 2019 001

Title: One (1) New Hi-Rail Road Repair Truck

RE: Clarifications/Questions

Please note the following clarifications to the above referenced RFP:

1. **Question** – The way the specifications read is that the hydraulic circuit and connectors for the Hoesch Jacking System are to be supplied by Vendor. The Hoesch Jacks and beams etc are not to be supplied by Vendor as ONTC has the Jacks and beams already. Is this correct?

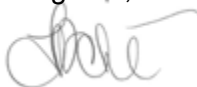

Answer – Yes, this is correct.

2. **Question** – Please confirm if the crane is to be mounted behind the rear wheels but will be in front of the rear reel compartment. (See photo of a similar CP rail unit.)

Answer – Yes, this is correct.
